Message from the President

*As a globally recognized metal expert with operations extending throughout Middle East, Far East, South East Asia & Africa, **we are committed to preserving the Environment & building a brighter future.** From a humble beginning in 1999, PGI today is one of the vital link for many national & international metal manufacturers & foundries in Recycling Industry. We Procure, process and recycle all kinds of ferrous and non-ferrous metals.*

Our commitment to Recycling has been reinforced by getting Industrial license, thus taking step towards forward integration. We have the capability and infrastructure to handle large volumes. We can fulfill any demand on a timely basis with strict adherence to international quality & safety standards. PGI today has extensive network of yards in UAE & Thailand fully equipped with Modern Infrastructure and latest equipments. We also have cable peeling & automatic cable granulation facilities in UAE & Thailand.

As we continue to expand globally, our mission at PGI is to continuously offer world class customer service. Our company has over 2 decades of experience in this industry and has always made sure our customers get the best Material & services at the right time.

When you do business with PGI, you're not just assured of a quality product, but a long lasting relationship with a company that has a strong industry reputation for being totally committed to customer satisfaction.

We welcome you to contact us anytime of the day regarding any aspect of your scrap and metal recycling requirements. We look forward to hear from you!

Overview

- Established in Year 1999
- Two Recycling Yards in Sharjah, UAE
- Automatic Cable Granulation / Peeling facilities
- ISO 14001 Certified Company
- Complete range of Ferrous & Non Ferrous Scrap
- Two Recycling Yards in Bangkok, Thailand
- Representative Offices in China, India, Korea, Oman, Pakistan
- Total Employee Assets of over 200 People

Our Vision

Be & be recognized
as Leader in
Recycling World

Our Mission

To be a reliable source of
recyclable material by adopting
innovation and technology

Our Values

- Honesty, Integrity & Ethics not to be compromised.
- Invest in continuous learning & innovation.
- Creating value from Waste
- Promoting meritocracy & professionalism

Social Responsibility Towards Community

"Live as if you were to die tomorrow. Learn as if you were to live forever." - Mahatma Gandhi

At PGI Group, we emphasize on education of young generations. In an effort to shoulder our responsibility, we have sponsored **10 EKAL SCHOOLS** for rural education. We are committed to creating a difference and being responsible citizens in our communities. We support local groups and organizations by time, money and essential skills to help make our communities better places to live and work.

Social Responsibility Towards Environment

At PGI Group, we ensure all our practices are as "Green" as possible. Recycling and Sustainability moves hands to hand and we are committed to wise use of limited natural resources.

Quality Control

Our quality control systems and processes are managed by team of experts covering aspects of manual sorting, weighment, bailing, bundling and radioactivity check. Through our globally network operations, we do extensive international buying and selling of ferrous and non ferrous metals with a capability to handle bulk and containerized cargoes almost everywhere. With our fully equipped warehouses, skilled workforce and environment friendly storage facilities, we fulfill our commitments to our customers with timely deliveries even in adverse situations.

Our quality control policies have evolved from this core fundamental principal:-

- Our quality management systems provide a structured framework in improving quality of our products that are environment friendly meeting international standards.
- We are committed to meeting worldwide regulatory requirements and standards and minimize adverse environment effect that may arise of our activities.
- Our well trained staffs coupled with advanced technology provide utmost importance to the quality of metal that is brought, processed and sold to minimize environmental effects in storage, treatment and transportation processes.
